

Passo a Passo

Abrir CMD, dando cd na pasta da API.

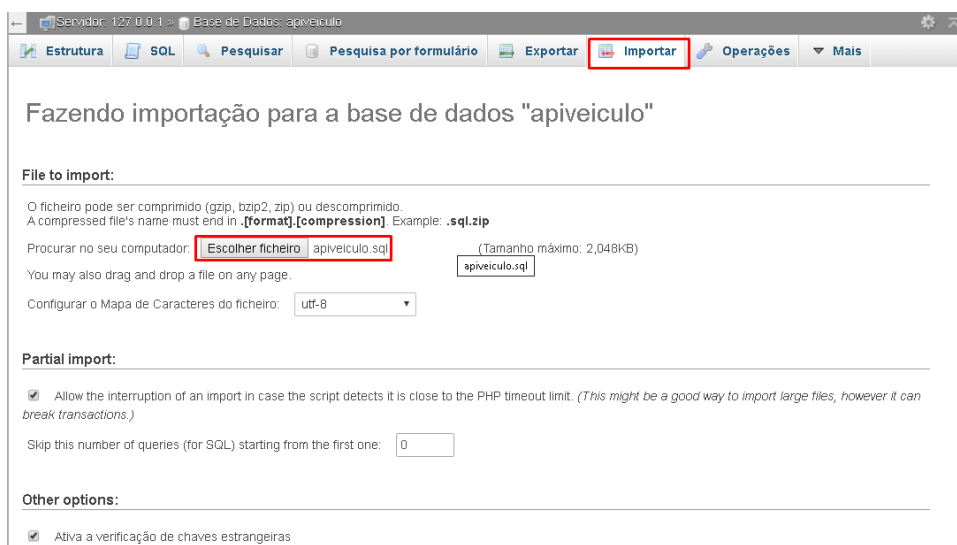

Rodar os comandos:

Npm install -g nodemon

Npm init -y

Npm i --save restify restify-errors knex mysql

Importar o banco para o mysql do XAMPP:

Rodar o comando do nodemon para encher o banco depois de instalado:

nodemon index.js

cmd. C:\Windows\System32\cmd.exe - nodemon index.js

```
C:\Users\Leonardo Braga\Desktop\Api-Node>nodemon index.js
[nodemon] 1.19.2
[nodemon] to restart at any time, enter `rs`
[nodemon] watching dir(s): *.*
[nodemon] starting `node index.js`
myapp listening at http://[::]:8080
```

Usar o Postman para testar a API:
